

Drinking Water

Keep it fresh

Thousands of pipes run throughout the region to transport water from local water bodies, to water treatment facilities, to our faucets.

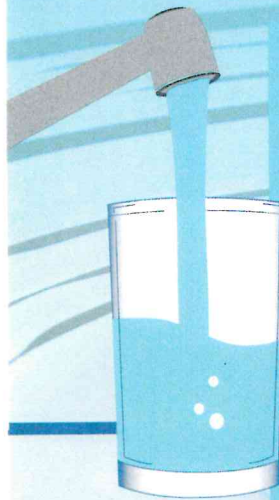

Southeast Michigan's drinking water providers operate and maintain large and complex systems to bring drinking water of unquestionable quality to the entire region.

Drinking Water

Keep it fresh

Tips:

- Pay attention to “Boil Water Advisories” and “Do Not Use Advisories.”
- Learn more about the age and condition of your home’s water infrastructure.
- Read your community’s annual drinking water quality report to find out more about your drinking water.
